昨日，内蒙古与美国磁悬浮管道技术公司的合作框架协议签字仪式在呼和浩特市举行。

Yesterday the signing ceremony of a cooperation frame agreement signed by Inner Mongolia with American Magplane Pipeline Technology Company was held in Huhhot.

内蒙古自治区政府顾问周德海出席。

Mr. Dehai Zhou, Consultant for the Government of Inner Mongolia Autonomous Region, attends this signing ceremony.

内蒙古地域辽阔，有丰富的煤炭、稀土等矿产资源，煤炭运输是目前急需解决的难题。美国磁悬浮管道技术公司是一家专门从事磁悬浮运输的技术研究与开发的企业，其研制开发的磁悬浮管道运输系统技术，既不受地形制约，又可大大降低建设投资和经营成本。我区与该公司的合作将磁悬浮管道运输系统技术应用到煤炭及矿山资源物流运输市场。(刘洋)

The Inner Mongolia has vast territory, rich in coal, rare earth, mineral resources, and so on. At present the coal transportation is the difficult problem which needs the urgent solution. The American Magplane Pipeline Technology Company is a special engineering R&D enterprise on the maglev transportation. Its developed maglev pipeline transportation system technology, is not only restricted by the terrain, but also can greatly reduce the construction investment and the operation cost. Our cooperation with this maglev company will apply the pipeline transportation system technology to the transportation market of coal and mine resources. (Yang Liu)
